	Large	707	£65.80=30,£2.19ea.
Prescription quantity: 30 per box; 60 = 4 week supply (can remain in position for up to 12 hours)			

Suggested quantities to order or prescribe on prescription are highlighted below each section in red.

Ensure when you are ordering or prescribing continence related products you order sufficient supplies to meet the patients' needs but reduce any unnecessary waste. In most cases this would be a **month's supply**.

The prescribed continence products are the property of the named patients to whom they have been dispensed and must not be used for another patient.

Patients who require continence products for time limited periods should have the quantities adjusted accordingly to ensure sufficient supplies but to reduce the possibility of waste.

Use of appliance contractors

Patients may obtain their supplies from either:

- Dispensing contractor (Community Pharmacy, Dispensing Doctor)
- Dispensing Appliance Contractor (DAC)

Retrospective prescribing i.e. requesting delivery of a product before the prescription is submitted to the contractor must not occur.

Please see additional guidance regarding this on the [formulary website](http://www.devonformularyguidance.nhs.uk).

Contact Details

Clinical staff can call on the Bladder and Bowel Care Services to give support, help or advice in the care of any particular patient or to assist in decision making regarding urinalysis.
